

For Immediate Release

Announcing Engineered Audio, LLC.

SAINT LOUIS, MISSOURI, June 1st, 2003 -- Engineered Audio, founded in 2002, is a new company specializing in exciting, innovative computer oriented consumer electronics. Among other items, Engineered Audio is developing unique audio related hardware and software products for the Apple Macintosh and Microsoft Windows platforms, for everyone from the technophobe to the technophile.

With company headquarters and distribution center located in St. Louis, Missouri, Engineered Audio is set to launch its line of products in the coming weeks, products which include the Aurius, a USB Audio device with an FM transmitter; and RemoteRemote, a wireless RF remote control for the Apple iPod. Engineered Audio develops its own products and markets these nationwide to the individual consumer via a growing on-line presence.
